Wild Parsnip Warning

Along with the arrival of summer in Leeds & Grenville County comes an abundant new growth of Wild Parsnip. This invasive poisonous weed should be avoided as it poses a significant health risk to persons. An explosive growth of Wild Parsnip has resulted in many people suffering serious burns to the skin as a result of contact with sap from the plant.

Wild Parsnip can be found throughout Leeds and Grenville County within uncultivated land, roadside ditches, and parkland, nature trails, and sports fields as well as on and around residential properties.

Characteristics

- Height: 1 to 2 metres.
- Leaves: Pinnately compound with 2-5 pairs of opposite, sharply toothed leaflets.
- Stems: Completely smooth and reddish/green in colour.
- Flowers: Yellow, umbrella shaped 10-20 cm across / similar in appearance to dill.

WHAT IF I COME INTO CONTACT WITH WILD PARSNIP?

1. Seek immediate shelter (exposure to sap makes human skin hypersensitive to sunlight).
2. Thoroughly wash exposed skin with soap and water.
3. If skin reacts, seek medical attention.

From the Desk of
Brent Rathwell, Seasonal Campers' Liaison, Site G-17

What great weather we have been having; lots of sun without too much rain.

Canada Day weekend was a great success with a performance by Ambush followed by a delicious chicken barbeque being held at the pavilion on June 29th. The Doherty Brothers' concert along with the cake and ice cream celebration was enjoyed by a full house on Canada day. The Poker tournament which was held on June 28th was also well attended and we were able to once again financially contribute to the coffers of the Seasonal Campers' Recreation Committee.

I hope everyone had an opportunity to taste the pies that were available at the pie / bake sale at the pavilion a couple of weeks ago. If you check your calendar of events, you will see lots of functions going in the near future including the ever popular Delta Fair and another Hold'em Poker Tournament at 1 p.m. on July 27th. A display from Little Ray's Reptiles will be here on the 31st and much, much more as the summer continues.

Congrats goes out to the "G" Section foursome that won the golf tournament on July 13th; the details of which you will find elsewhere in this issue.

If anyone has any concerns or something they would like to see in next month's post, please contact myself at Site G-17.

Thanks & Happy Camping!

CARBON MONOXIDE

Stop this silent killer

Ah, camping – a safe, fun and relaxing experience in the great outdoors, right?

Well, nothing's perfect.

There's a silent killer on the loose, and it's called **carbon monoxide** (CO).

You can't smell it, see it, or taste this invisible, odourless gas.

But you can stop this silent killer.

Here's how.

Camp Safely – without the risk of Carbon Monoxide

For Campers, Trailers and RVs:

- Never block the combustion exhaust vent on the outside wall of your RV or trailer.
- Never construct an enclosed space around the vent (where the exhaust cannot escape).
- Have a certified fuels technician inspect and maintain your propane equipment annually.
- Install a CO alarm and propane leak alarm.
- Use designated spaces for storage and transportation of gas cylinders.

For Tents:

- Never use portable fuel-burning equipment, such as portable propane/kerosene heaters, stoves or BBQs, in your tent or any enclosed space.

What to do when you arrive at your campsite

Campsite Safety Checklist

- Arrive at your campsite in daylight.
- Check the site for glass and sharp objects.
- Check for poison ivy, bees, ants and dead overhanging branches that may fall.
- Ensure that open fires on your campsite are permitted by local or provincial authorities.
- Ensure all propane stoves and heaters are properly connected and used appropriately.
- Keep your campsite tidy to avoid accidents.
